Document Title: Student Internship Project Guide
This document is created for testing document question-answering systems. It contains information about internship projects, objectives, and ideas.

Internship Details

This document is related to a 6-month internship program for computer engineering students. The internship focuses on practical skills, real-world projects, and industry exposure.

Project Ideas Mentioned

The following project ideas are mentioned in this document:
1. AI-Based Resume Screening System – Automatically ranks resumes using machine learning.
2. Document Question Answering System – Allows users to upload PDFs and ask questions.
3. Smart Attendance System – Uses face recognition to mark attendance.
Total Number of Project Ideas: 3

Conclusion

Students are required to select any two projects from the above list and complete them during the internship period.
